

Dynatronics Traction/Decompression System

Dynatron T4™ Traction/Decompression Table

The new Dynatron T4™ table represents a quantum leap ahead in a full featured, robust, decompression / traction tables. Combined with the DX2 Traction Unit, the Dynatron T4 table also represents the most innovative and complete traction package available. The friction-free traction platform maximizes patient comfort and treatment outcomes. Dual full length foot switches make it easy to adjust the angle of pull from almost anywhere around the table. This allows you to selectively direct the decompression / traction force to where it is needed most, all at the touch of a switch. When not being used for decompression / traction, the T4 table is the perfect treatment table for all your patients needs.

Dynatron DX2™

The DX2 Decompression / Traction Control Unit brings treatment to a new level. The Dynatron DX2, computer based system, automatically calculates and digitally displays the angle of pull. This allows for Targeted Decompression, a big plus for insuring consistency and effectiveness, from treatment to treatment. The DX2 interactive touch-screen display facilitates patient education and makes treatment set-ups quick and easy. Two Machines in One - In addition to delivering Decompression Therapy, the Dynatron DX2 offers the option of incorporating Laser and Hands-Free Light Therapy, setting the new standard for Decompression/Traction systems.

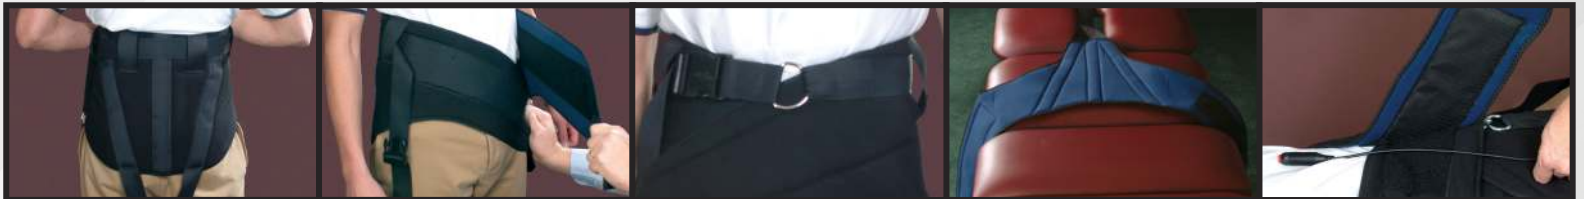

D890 Laser applicator

XP Light Pad

Enhance your decompression / traction treatment by adding the optional 7,500 mwatt light pad, and 890 Laser applicator.

DynaWrap Traction Belts make set-up quick, easy and comfortable

DynaWrap™ Traction Belts

Uniquely shaped traction belts are designed to be more comfortable, dispersing forces over larger area. Tapered design contours to the body while resisting slippage. Strong Velcro closure securely holds against traction forces while being easy to apply and release. Belt package includes: Thoracic belt, Lumbar belt, circumferential belt for Lumbar, and Y-strap for securing to the table.

Saunders® Cervical Traction Device

Perform supine cervical traction without insulting the TMJ. Cervical traction has never been easier, more comfortable, or more effective.
